

A New Way to Clean Your World While Saving it at the Same Time

Enozo Technologies Revolutionizes the Way you Clean - and it's available on Amazon!

January 2020 – (United Kingdom) – If you use harmful chemicals to clean, pay attention. There's a better and less toxic way to clean and sanitise around your home without those nasty chemicals.

Now, the technology created by [Enozo Technologies, Inc.](#) is available for purchase on [Amazon](#). So clean out all the harmful chemicals under your sink and use just one bottle to make your home fresh and clean – EnozoHOME.

[EnozoHOME](#) is a multi-purpose cleaner that turns regular tap water into a powerful sanitiser with the pull of a trigger. Harnessing the best of both nature and science, the MIT masterminds behind Enozo Technologies, Inc. have created a bottle that converts regular tap water into nature's most powerful sanitiser – aqueous ozone.

How it Works

The EnozoHOME spray bottle has a patented diamond electrolytic cell in the trigger that, when engaged, turns regular tap water (H₂O) into aqueous ozone (O₃). Aqueous ozone, when used as directed, is a powerful sanitiser capable of killing 99.9% of some of the most harmful germs and pathogens around your home. What's even better is that there is no chemical residue left behind after spraying. So, those with sensitive skin and/or allergies can rest assured that they won't suffer from any kind of negative reactions common with toxic bottled chemicals. This means that kids, babies and pets can come into contact with the spray without the fear of being poisoned – unlike other chemical home cleaners.

Why Buy It?

This single bottle replaces nearly all of your current cleaners and sanitisers that you keep under your sink. It will save you from having to spend weekly to on new cleaners as well as save you storage space in the home. With EnozoHOME, there is no risk of being harmful to children or pets. It's also highly effective against pet odours. EnozoHOME sanitises 99.9% of some of the most harmful bacteria and only leaves behind a clean smell – no chemical residue.

Stop spending money week after week on harsh chemical cleaners and buy EnozoHOME once. Not only does it hold more than typical chemical cleaners, you can refill it over and over again – saving money and the environment at the same time!

Learn more about EnozoHOME and revolutionize the way you clean our world. Purchase your EnozoHOME spray bottle today from [Amazon.co.uk](#).

About Enozo Technologies, Inc.

Since 2010, when the company first took shape as Electrolytic Ozone, Inc., Enozo Technologies, Inc. has been utilizing the best-of-the-best in science, technology and experience to change the world for the better. The mission is to develop a solution to replace toxic chemicals for sanitising and cleaning in industrial and home applications to revolutionize health and safety for all. Today, Enozo Technologies, Inc. is focused on harnessing that core mission combined with the power of nature to prevent future illness and death. For more information about Enozo Technologies, Inc., visit Enozo.com.

About EnozoHOME

The EnozoHOME spray bottle (SB-100-HD) offers a water-based alternative to traditional cleaners and sanitisers. Inside the spray bottle is a state-of-the-art electrolytic cell that turns normal tap water into aqueous ozone (AO) to kill 99.9% of some of the most harmful bacteria including E. Coli, Salmonella, MRSA, Listeria and Legionella. EnozoHOME is easy-to-use and safe for the environment, eliminating the need for multiple chemical cleaners. It works as a sanitiser, deodorizer and cleaner to also remove unpleasant odors and leaves behind no residue. For more information, visit Enozo.com.
